## 01 Professional profile

Solutions Architecture and Data Engineering specialist with *more than a decade* across data platforms, cloud, governance and technical leadership.

Combines hands-on implementation, architectural decision-making and team development across financial services, retail, technology and education, working remotely in Brazil and with international teams. Extensive experience modernizing on-premises platforms to the cloud and delivering AI and machine learning solutions integrated with data engineering. **Certified by Harvard University's SQL, Python and Artificial Intelligence program (CS50 AI & Databases Alumna).**

## 02 Certifications

## 03 Career highlights

GLOBAL SCALE

### Heineken

Data architecture for the Brazilian operation within a global structure, with technical counterparts in five countries.

INTERNATIONAL CASE STUDY

### Carrefour

C4Data implementation on OpenMetadata, published as an international OpenMetadata case study.

FINANCIAL SERVICES

### Itaú Unibanco

Four years across four roles spanning senior engineering, technical leadership, product and chapter leadership.

DATABRICKS

### 3l credentials

Including Data Engineer Professional and Azure Databricks Platform Architect.

# 04 Professional experience

2025 to 2026

## Heineken

CONSUMER GOODS
GLOBAL OPERATIONS

### Solutions and Data Architecture Specialist

- Led data architecture for the Brazilian operation within a global structure, working with technical counterparts in the Netherlands, Portugal, Poland, Mexico and the United States.
- Worked across data engineering, FinOps (cloud cost management), governance, architecture decisions and pre-production validation.
- Structured reusable technical knowledge and designed the NavNext voice and text pilot, built on a premise of global expansion.

`Microsoft Azure` `Databricks` `Azure Data Factory` `Power BI` `SAP` `Theobald Software` `Azure Storage` `Azure AI Foundry` `CosmosDB`

2024 to 2025

## Carrefour

RETAIL
BRAZIL AND FRANCE

### Data Architecture, Governance and Quality Lead

- Implemented C4Data on OpenMetadata hands-on; the implementation was published as an international OpenMetadata case study.
- Coordinated a team of four and served as the technical interface with Carrefour France.
- Integrated ownership, lineage (tracing where each piece of data comes from), glossary, access and metadata automation.

`OpenMetadata` `Google Cloud Platform` `BigQuery` `Apache Airflow` `Datadog` `Cloud Functions` `Cloud Run` `Pub/Sub` `Dataflow`

2020 to 2024

## Itaú Unibanco

FINANCIAL SERVICES

### Senior Engineer · Tech Lead · Technical Product Manager · Chapter Lead

- Provided technical leadership and development for the Data Factory, enabling governed access across Hadoop, Cloudera CDP and AWS.
- Trained engineers and developed new leaders.
- Drove observability, FinOps and the technical evolution of the Unified Credit Platform.

`Python` `Java` `PySpark` `Apache Kafka` `AWS Glue` `Aura` `Keyspaces` `AWS Cloud` `Data Mesh`

2022

## Oracle

TECHNOLOGY · CLOUD

### Solutions Architect · Customer Success

Designed solutions and guided Oracle Cloud Infrastructure adoption for financial institutions. Modernized legacy databases to Autonomous Database and tracked risks and opportunities through health scores (account health indicators).

`Oracle Database` `Oracle Cloud Infrastructure` `Autonomous Database` `Exadata` `Data Guard` `RAC` `GoldenGate` `Enterprise Manager` `PL/SQL`

2022

## Creditas

FINTECH

### Data Engineer

Restructured the AWS data lake and built incremental pipelines with Apache Hudi. Automated data quality with Great Expectations, evaluated lakeFS through a POC and automated infrastructure and delivery with Terraform and CI/CD.

`AWS S3` `AWS Glue` `Amazon EMR` `Amazon Redshift` `Redshift Spectrum` `PySpark` `Apache Hudi` `Great Expectations` `Airflow`

2021 to 2022

## QuintoAndar

PROPTECH

### Data Reliability Engineer

Modernized data platform reliability on Google Cloud and AWS. Standardized deployments with Kubernetes and Helm, rolled out cataloging and lineage with Apache Atlas, and evolved observability and operational support for platform components.

`Kubernetes` `GKE` `Helm` `Docker` `Apache Atlas` `Terraform` `Airflow` `Python` `Prometheus`

2019 to 2020

## Cogna Educação

EDUCATION

### Data Engineer and Technical Lead

Built an end-to-end finance data platform on AWS. Migrated monolithic on-premises queries to PySpark pipelines on EMR orchestrated by Airflow, publishing validated data to Redshift for consumption in Power BI. Implemented reconciliation, quality gates, Pytest and Terraform. Grew into the technical lead role.

`Python` `PySpark` `Apache Airflow` `Amazon EMR` `Amazon S3` `AWS Glue` `Amazon Redshift` `Power BI` `Terraform`

2018 to 2019

## Serasa Experian

DATA AND CREDIT

### Data Engineer · DataLab

Built enrichment pipelines for DataLab models and data products. Delivered distributed processing with Spark, Hadoop/HDFS storage and Elasticsearch queries for exploration and low-latency access.

`Python` `Spark` `Hadoop` `HDFS` `Elasticsearch` `AWS Lambda` `CloudFormation` `pandas` `NumPy`

2018

## Dafiti

E-COMMERCE

### Python Developer

Introduced distributed processing and cloud architecture to data engineering. Modernized workloads with PySpark, EMR, S3 and BigQuery and laid the foundation for applying machine learning to detect anomalous sales.

`Python` `PySpark` `Apache Spark` `Amazon EMR` `Amazon S3` `Google BigQuery` `scikit-learn` `Airflow`

2017

## IBM

TECHNOLOGY

### Data Engineer · Big Data

Delivered two solutions within the same engagement: near real-time ingestion for Santander's CRM and campaign monitoring through Amazon APIs, with dashboards and an alerting chatbot.

`Hadoop` `Apache Kafka` `Flume` `Hive` `Apache Camel` `Control-M` `Java`

2017

## Santander

FINANCIAL SERVICES

### Data Engineer

Built and automated batch pipelines bringing relational data into the corporate Big Data ecosystem. Delivered distributed processing, analytics enablement and platform access and security controls.

`Sqoop` `Apache Spark` `Hadoop` `HDFS` `Hive` `Impala` `Cloudera` `Shell Script` `Sentry`

2016 to 2017

## Cetip (B3)

FINANCIAL MARKETS

### Data Engineering and Information Management

Built PL/SQL automations for statistical routines and information management analyses in the financial market. Provided technical support for the Cloudera/Hadoop platform and analytics consumption through TIBCO Spotfire.

`Oracle PL/SQL` `TIBCO Spotfire` `Cloudera` `Hadoop` `Hive` `Impala` `Sentry` `Kerberos` `Shell Script`

# 05 Education

UNDERGRADUATE

## FIAP

Technologist degree in Systems Analysis and Development
Data Engineering and Big Data

POSTGRADUATE

## Mackenzie

POSTGRADUATE

## PUC Minas

Distributed Software Architecture

## 06 Core competencies

| | |
|---|---|
| ARCHITECTURE AND ENGINEERING | Python · SQL · PySpark · Apache Spark · Kafka · Airflow · Lakeflow · Delta Lake · Apache Hudi · Batch and streaming pipelines |
| CLOUD AND PLATFORMS | AWS · Google Cloud · Azure · OCI · Hadoop · Cloudera · BigQuery · Redshift · Oracle · Databricks · Lakehouse |
| GOVERNANCE AND RELIABILITY | OpenMetadata · Apache Atlas · Great Expectations · Data catalog · Lineage · Ownership · Observability · Data quality · FinOps |
| DELIVERY AND LEADERSHIP | Terraform · Kubernetes · Helm · Docker · Git · CI/CD · Automated testing · Solution design · Technical leadership · People development |
| AI AND ANALYTICS | Machine learning · MLOps · RAG · AI agents · Response evaluation · DeepEval · Power BI · Tableau · Grafana · Elasticsearch |

## 07 Additional credentials

**30** DATABRICKS ACADEMY **6** AWS ON CREDLY ALL VERIFIABLE ONLINE

### ARCHITECTURE AND PLATFORM 07

- Azure Databricks Platform Architect ACCREDITATION
- Architecting Data Warehouses for Large-Scale Deployments
- Data Modeling Strategies
- Building Semantic Models in Databricks with UC Metric Views
- Databricks Data Privacy
- DevOps Essentials for Data Engineering
- Automated Deployment with Declarative Automation Bundles

### ENGINEERING, LAKEFLOW AND SPARK 10

- Build Data Pipelines with Lakeflow Spark Declarative Pipelines
- Advanced Techniques with Spark Declarative Pipeline
- Advanced Techniques with Spark Declarative Pipeline KNOWLEDGE BADGE
- Deploy Workloads with Lakeflow Jobs
- Data Ingestion with Lakeflow Connect
- Introduction to Apache Spark
- Developing Applications with Apache Spark™
- Stream Processing and Analysis with Apache Spark™
- Monitoring and Optimizing Apache Spark Workloads on Databricks
- Databricks Performance Optimization

### SQL AND ANALYTICS 03

- SQL Programming and Procedural Logic
- SQL Analytics on Databricks KNOWLEDGE BADGE
- AI/BI for Data Analysts KNOWLEDGE BADGE

### MACHINE LEARNING AND MLOPS 06

- Data Preparation for Machine Learning
- Machine Learning Model Development
- Machine Learning Model Deployment
- Machine Learning Operations
- Advanced Machine Learning Operations
- Machine Learning at Scale

### GENERATIVE AI AND AGENTS 04

- Building Agentic Applications on Databricks
- Building RAG Agents with Agent Bricks
- Deploying and Monitoring Agent Applications on Databricks
- Agent Evaluation on Databricks

### AWS DEMONSTRATED 06

- Securing Agent Identities UNTIL 13 OCT 2027
- Databases for Agentic AI UNTIL 12 OCT 2027
- Data Lakehouse UNTIL 11 OCT 2027
- Data Streaming UNTIL 11 OCT 2027
- Data Visualization UNTIL 11 OCT 2027
- MLOps UNTIL 11 OCT 2027

## 08 Community and recognition

STAGE

### The Developers Conference

Speaker and track coordinator, with 38 talks and workshops.

MENTORING

### NASA Space Apps

Mentor at the challenge, providing technical mentoring and professional development.

COMMUNITY

### Mentoring and events

Mentoring and community activities with IBM, Women Game Jam, Fatec and ESPM.

HACKATHONS

### Recognition

Petrobras, Sprinklr, Meu Município and Serasa Experience Jam.

ENTREPRENEURSHIP

### Iara · FIAP Startup One

Finalist project in 2017; Bora rachar and other public technical demos.

PROJECTS

### 12 AI projects

Artificial intelligence projects documented at github.com/jenniferevangelista-de.
